

Professional UI/UX Specification

Education Startup Platform (Phases 1–3)

This specification is intended for UI/UX designers and frontend developers. It defines the layout, components, interactions, validation, and responsive behavior for the MVP and early growth stages.

Home

Purpose: Convert visitors into free-trial leads

Layout

- Accessible labels
- Keyboard navigation
- Optimized for Core Web Vitals

Parent Portal

Purpose: Deliver parent portal experience

Layout

Desktop: 12-column grid • Tablet: 8-column • Mobile: Single-column responsive.

Sections

- **Header:** Breadcrumbs and page title
- **Main Content:** Cards/tables/forms specific to module
- **Sidebar:** Where applicable
- **Footer:** Consistent footer

Interactions

- Responsive interactions
- Toast notifications

Validation & UX

- Inline validation
- Loading skeletons
- Clear success/error messages
- Accessible labels
- Keyboard navigation
- Optimized for Core Web Vitals

Authentication

Purpose: Deliver authentication experience

Layout

Desktop: 12-column grid • Tablet: 8-column • Mobile: Single-column responsive.

Sections

- **Header:** Breadcrumbs and page title
- **Main Content:** Cards/tables/forms specific to module
- **Sidebar:** Where applicable
- **Footer:** Consistent footer

Interactions

- Responsive interactions
- Toast notifications

Validation & UX

- Inline validation
- Loading skeletons
- Clear success/error messages
- Accessible labels
- Keyboard navigation
- Optimized for Core Web Vitals

Design System

- Typography scale (H1-H6, body, captions)
- 8px spacing system
- Primary/secondary color palette
- Rounded cards and buttons
- Consistent iconography
- Light theme first; dark mode optional
- Reusable components: buttons, inputs, cards, modals, tables, accordions, tabs, badges

Developer Handoff

Every page should include component names, API bindings, loading state, empty state, error state, responsive behavior, accessibility notes, and acceptance criteria before implementation.
